PROFESSIONAL SUMMARY

Results-driven **Full-Stack Software Engineer with 2+ years of experience** at Cognizant, building scalable, object-oriented applications using **Angular, Java/Spring Boot, Python, and Oracle/SQL Server**. Led a Credit Risk modernization on AWS (556+ legacy files → RESTful microservices) and built **GenAI/LLM automation tools** using LangChain, reducing manual effort by 40%. Skilled in Agile/Scrum, CI/CD, unit testing, code reviews, and technical documentation.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, PL/SQL, SQL
Frontend: Angular (v14–v18), HTML5, CSS3, Bootstrap, Responsive Design
Backend: Spring Boot, Python Flask, REST APIs, Microservices Architecture
Databases: Oracle DB, Microsoft SQL Server, MySQL, PostgreSQL, Stored Procedures, Triggers, Mongo DB
GenAI / LLM: LangChain, Prompt Engineering, LLM Integration, AI Workflow Automation, Retrieval-Augmented Generation (RAG)
Cloud & DevOps: AWS (EC2, S3), GCP, Git/GitHub, Jenkins, CI/CD, Spring Batch

UW Credit Risk Application Modernization | Angular 18, Java, Spring Boot, MS SQL Server, AWS Dec 2025 – Present

- ▶ **Modernized a mission-critical Credit Risk application** by migrating it from legacy Classic ASP to **Angular 18 + Spring Boot on AWS**, eliminating EOSL risks and significantly improving scalability and performance.
- ▶ Performed reverse engineering of **556+ legacy files, 115 stored procedures, and 130+ SQL tables** to extract undocumented business rules and ensure 100% accurate logic migration.
- ▶ Built RESTful APIs and microservices, modernized Angular UI components, and migrated batch jobs using **Spring Batch**; conducted parallel-run/UAT validation enabling a **zero-data-loss production cutover**.

GenAI-Powered Workflow Automation | Python, LangChain, LLMs, REST APIs, Prompt Engineering 2024 – 2025

- ▶ Designed an **LLM-based automation tool** for internal reporting and data summarization, **reducing manual effort by 40%** across recurring workflows.
- ▶ Engineered **LangChain pipelines and prompt-engineering strategies** to improve response accuracy, consistency, and contextual relevance.
- ▶ Exposed Generative AI capabilities through **REST APIs** for seamless integration into existing enterprise applications.

Enterprise Data Management System | Angular, Python, PL/SQL, Oracle DB, REST APIs

2024

- ▶ Built a scalable full-stack data management platform with Angular frontend, **Python REST backend**, and Oracle PL/SQL data layer supporting enterprise-grade operations.
- ▶ Implemented complex **stored procedures and database triggers** to enforce business rules and ensure cross-module data integrity.

Programmer Analyst Trainee

December 2023 – December 2024

- ▶ Completed intensive enterprise training in **Angular, Python, Java, PL/SQL, and SQL**; contributed to production support, debugging, and Git/CI-CD-based deployments alongside senior developers.

CERTIFICATIONS

- ▶ **Certified in GitHub Copilot Developer – AI-Assisted Code Companion** 2026
- ▶ **Certified in Microsoft 365 Copilot – Copilot Foundation** 2025
- ▶ **Certified in Prompt Engineering – Prompt Engineering Foundation** 2024
- ▶ **Certified Generative AI Associate – Gen AI Fundamentals** 2025
- ▶ **Data Analytics Virtual Internship (10 weeks) — AWS Academy** 2022
